materials

WHY US?

World In Sign (WIS) is a deaf owned company. When we talk about communication accessibility, we know what we are talking about.

We believe in employing sustainable development goals in all our endeavors as we aim to empower populations often left behind by researching, innovating in and providing telecommunication technology and services so they can reach their full potential. WIS partners with businesses, individuals and communities all around the world to achieve it.

"You matter - no matter how you communicate"
